## Project Civil / Structural Engineer

**Position Title:** Project Civil / Structural Engineer (Circa 2-5 years' experience)

**Location:** Dublin

**Company:** Founded in 2006, DRA Consulting Engineers are an established firm of Consulting Civil & Structural Engineers & Project Managers with offices in Dublin, Limerick and Wexford. As part of our continued growth, we are looking for a Project Engineer to add to our team in Dublin.

We provide services to both private & public sector clients with an emphasis on economical design, sustainability and a client focused approach. Our projects portfolio includes residential, commercial, educational, civil infrastructure, utilities and renewable energy. We also have particular expertise and experience in civil & structural engineering, project management, high-rise construction, conservation engineering, construction law & contract administration. Please see our website for more details: [www.draconsulting.ie](http://www.draconsulting.ie)

### Job Specification:

The role will involve the following:

- Civil / Structural Engineering Design and Project Management.
- Use of design software including Robot, CADS, Tedds, Causeway Drainage Design & Civil 3D
- Preparation and co-ordination of civil & structural engineering drawings using Revit & AutoCAD.
- Administration & project management of projects.
- Providing mentorship and supervision of graduate engineers / technicians.
- Liaising with clients, design team members and other members of staff.

### The Successful Candidate - Requirements:

The successful candidate must meet the following requirements in terms of skills and attributes:

- An honours degree in Civil or Structural Engineering.
- Minimum of 2+ years' experience in the field of consulting civil & structural engineering.
- Be a member (or become a member) of Engineers Ireland or the Institute of Structural Engineers.
- Competent in the use of AutoCAD drafting software and Revit.
- Proficient in Microsoft office applications including Outlook, Word and Excel.
- Experience with civil & structural engineering design software.
- Excellent communication and organisational skills.
- Excellent problem-solving skills and in the development of design solutions.
- Self-motivated, career focused and with ambitions to reach chartered engineer status.
